

JD Number: 280

Title

network engineer

Description

Flexible Systems has been helping businesses with technology for over 30 years. We are dedicated to providing a hassle-free technology experience to our clients. Our network operations center monitors, maintains, and supports the servers, computers and networks of hundreds of Long Island businesses. We are a leading provider of technologies including Citrix, VMWare, Microsoft Servers, Exchange, and Cisco. Our teams provide both helpdesk and on-site support to meet our client's needs. Flexible Systems is looking for a Network Engineer to join our team in Hauppauge, NY.

Job Description: We are seeking a motivated and enthusiastic Network Engineer with server, storage and network experience. You will work with the sales team to engage with sales prospects, understand and assess customer requirements, prepare and present demonstrations of Flexible Systems services, and address technical questions that arise throughout the sales process. You should be a confident engineer with excellent presentation skills and the ability to sufficiently present Flexible Systems services. The Network Engineer is responsible for installing, upgrading and maintaining network hardware, network operating systems, and network software as well as performing day-to-day system maintenance.

Requirements: Minimum of a Bachelor's degree in Computer Science or related technical major. Five+ years' experience

- Experience with implementation of servers, infrastructure and networking
- Troubleshoot servers
- Knowledge of network assessments
- Knowledge of network documentations and network diagrams
- Install network hardware
- Install and managing network services
- Provide client support and training
- Ability to answer technical questions about a wide range of hardware and software topics
- Ability to work independently with initiative to manage client technical issues for an effective conclusion
- Experience designing and presenting technical solutions to meet client requirements
- Strong analytical and problem solving skills
- Strong written and spoken communication skills
- Exceptional pre-and post-sales account management and follow-through skills, resourcefulness, and attention to detail

Application Instructions: Please send resume to careers@flexiblesystems.com. Please include position you are applying for in the subject line.

About Flexible Systems: Want to

work in an environment where individuals are important and teams are constantly curious? A place where different perspectives and experiences are valued?
